## ABOUT KVS

KVS Systems is a Chennai based software development company specializing in providing software solutions to the road transport industry. It is promoted by a transport company which has around 50 years' experience. This rich experience has helped us to understand the needs and problems unique to the industry and thus develop a perfect solution in line with the requirements of fleet owners and transport managers

## SOMA CMMS A Boon for Fleet Operators

SOMA CMMS is a computerized maintenance management system that helps to record, remind and analyze the various maintenance activities of a vehicle. It is an effective tool to plan and budget the scheduled maintenance. It is ideal for

Truck, Bus, Tourist cab operators, Educational institutions and corporate houses with a fleet of vehicles. The software facilitates fast decision making, provides accurate information and assists in enhancing overall fleet efficiency.
